Items in Green are produced fairly regularly and generally deckle combinations can be found.

Items in Yellow are produced less often - please enquire for any non-deckle filling specifications. A longer lead time is generally required for these specifications.

Items in White can be produced but we would require minimum makings of 25 tonnes and full deckle fill. As these are non-standard qualities an upcharge of Euro 25 per tonne will be charged to produce.

Items in black - not produced due to production difficulties.
